## Bidding Closes Again On Faculty Building

Four construction companies bid Thursday, May 29 on the faculty building, which has an estimated budget of \$1.8 million. The apparent low bid of \$2,036,564 was submitted by Nielsen Construction Company of Irvine, said

Leonard Farwell, business manager.

"We appear to be in an acceptable range over budget, however, the bids must be reviewed by the Public Works Committee, which meets at the end of the month," he said.

Planners here and at the Chancellor's Office agree that architectural modifications made on the plans for the building to bring it more closely in line with the budget will not change the functionality of the building, he added. Changes include the use of concrete blocks rather than poured concrete for the walls and modifications to the electrical and air conditioning systems.

If the building contract is awarded, construction could begin in late July. The original estimated date for occupancy of the building was June 1987.

In addition to the scholastic work on campus two days per week, the youngsters will be participating in civic enhancement projects for the cities of Riverside and San Bernardino, under a stipulation of the grant. Designed to teach work ethics and encourage minority students to continue their education, the project is national in scope. However, the Cal State project is the only one providing educational intervention, said Dr. Talley.

## Committee Named To Draft Educational Equity Plan

An eight-member committee, appointed by President Evans, has begun work on drafting the campus Educational Equity Plan, which must be submitted to the Chancellor's Office by July 1.

President Evans has given priority attention to the forthcoming report, which he believes will be one of the most important projects for the campus. The impetus for the campus plan stems from the CSU Educational Equity Advisory Council report. President Evans served on the CSU council, which presented its findings to Chancellor W. Ann Reynolds. Comments on this report were sought earlier by President Evans, who has met with numerous individuals and groups on campus regarding their suggestions.

Systemwide meetings have been held to advise the campuses on developing appropriate evaluation techniques and strategies to measure progress against goals and to review a possible model for the campus plans.

The charge given to the campus committee by the president is to address both student retention through educational support and access through meeting the needs of targeted underrepresented minorities. The CSU report urges universitywide effort including increased involvement by the faculty in the educational equity program.

The campus committee, chaired by Dr. Jerrold Pritchard (Academic Programs), includes: Milton Clark (English), Dr. Diane Halpern (Academic Programs), Walter Hawkins (Educational Opportunity Program), Dr. Tom Rivera (Educational Support Services), Dr. Gilbert Sanchez (Student Affirmative Action), Dr. Carl Wagoner (Criminal Justice, chair of Faculty Senate) and Cheryl Weese (Admissions).

## Searches In Progress For Four Positions

Committees searching to fill four administrative positions are in various stages of interviewing candidates and reviewing files.

Five candidates for director of the Coachella Valley Center were interviewed on campus during the past two weeks. Associate Vice President Jerrold Pritchard is chair of the committee, which expects to complete its work by July 1. The director will be responsible for administration of the new center, being established at College of the Desert. In addition to directing staff, scheduling courses and overseeing student support services, the director will be responsible for assessing the educational needs of the community and maintaining contact with community leaders.

Ninety-six applications were received for the new position of director of computing and information management services. Associate Vice President Amer El-Ahraf chairs the committee, which has now commenced reviewing files. A nationwide search was conducted for the position which will have overall management of information processing. The committee hopes to schedule interviews in late June or early July.

Executive Dean Judith Rymer chairs the search committee seeking a facilities planner. The 24 applications have been screened down to five candidates who will be brought to campus the week of June 16. Dean Rymer expressed pleasure with the quality of the pool of applicants. The planner will assume the responsibilities formerly held by James H. Urata relating to development of facilities and space usage.

An on-campus search is underway to fill the half-time position of associate dean of graduate studies. Dr. David Lutz, who held the post the past two years, has elected to return to full-time teaching in the Department of Psychology. Only on-campus candidates were sought for the position, said Dr. Pritchard, chair of the search committee.
